MND LEISURE

A new kind of urban leisure

It is in the heart of the famous and vertiginous Tower in China, one of the most spectacular buildings in the world due to its architecture and its hyperboloid structure, 600 meters high, that the French company MND Leisure, has imagined, manufactured and installed a sensational leisure site unique in the world, composed of acrobatic courses and a skywalk more than 300 m above the ground. Named Landmark Alpha, this new tourist attraction has opened to the public and will delight all lovers of thrills and breathtaking panoramas for the 2 million annual visitors to the Canton Tower.

IN THE HEART OF AN UNMISSABLE TOURIST ATTRACTION

Sponsored by Global Raytur, the company in charge of operating this project on the Canton Tower, Landmark Alpha is a new attraction designed to enrich the entertainment offer of the city of Canton by offering active and innovative leisure activities to both residents and tourists 365 days a year.

MND Leisure has shown creativity and innovation in the design and implementation of this sensational urban leisure project, which is unique in the world. The project consists of **three vertiginous acrobatic courses located between 188 and 298 meters above the ground and a skywalk located 325 meters above the ground.**

MND leisure business line, is one of the leaders in the market for sensational leisure infrastructures and contributes to the tourist attraction. To carry out this demanding project, the company's engineers and R&D office have deployed all their know-how acquired over 25 years in mountain development projects. At the heart of the work of Mark Hemel, the architect of the Canton Tower, the perfect integration of the three courses and the skywalk was the priority of the teams from the design phase and during installation. With the success of this flagship project in China, MND Leisure intends to accelerate its development in the growing segment of exciting urban leisure activities.

Key elements of the project

- 1 UNIQUE DESIGN
- 2 ARCHITECTURAL SITE RESPECT
- 3 VERTIGINOUS ACROBATIC COURSES
- 4 OPEN 365 DAYS PER YEAR

AN INCREDIBLE PANORAMIC VIEW OF THE CITY

A NEW ACTIVITY FOR A VERTIGINOUS EXPERIENCE

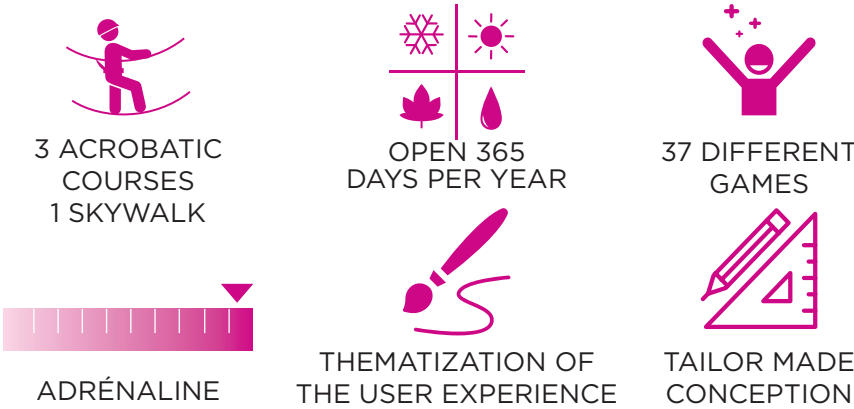

The three acrobatic courses have been designed to provide an unforgettable experience with different levels and many fun challenges. Accessible from 8 years old, the course is safe thanks to the continuous lifeline developed by MND. The games and obstacles have been specially developed for this project.

The Skywalk, located 325 meters above ground, is now one of Canton's new flagship attractions and offers an incredible panoramic view of the city thanks to a footbridge that is perfectly integrated into the existing structure. In addition to the 90m long walkway and the two balconies above the void, a new activity, called "IN & OUT", has been added to satisfy the most thrill-seekers: a mobile platform tilts 180° from the inside to the outside of the tower for an even more breathtaking experience.

The operator training for the Landmark Alpha project was carried out by MND Leisure teams on site.

PROJECT TECHNICAL CHARACTERISTICS

Insights from major project actors

Amanda LUO,
Global Raytur's CEO

« Due to its truly unique architecture and structure which resembles nothing else in the world, the implementation of this large-scale project was a real technical and logistical challenge that the French and Chinese MND teams were able to meet successfully. We are delighted to be working with MND, who put their 25 years of experience to work on the **Landmark Alpha** project for the benefit of visitors. Located in the heart of the Canton Tower, this is a first and the attendance since the pre-opening in mid-December already demonstrates the potential of this new attraction! »

Xavier GALLOT-LAVALLEE,
CEO of MND

« Today, we are very proud to be alongside Global Raytur to inaugurate the Landmark Alpha project for which the involvement of the teams since its design, its realisation and then its installation was total. This project is a fine example of the transfer of our know-how from the mountain to the urban environment and a flagship reference for MND in Asia. A real lever of attraction for the Canton Tower, we are convinced that **Landmark Alpha** will be a great success and that it will attract many new visitors. »

Thomas PESNEL,
Regional Director Asia & Oceania of MND

« MND is proud to have been part of the **Alpha Park** project and achieve its completion before the important milestone of the Chinese New Year. This project is clearly a first of a kind in the Asian region and we believe such urban landmark attractions will be replicated elsewhere in the other prominent cities of Asia. MND, thanks to its long experience of working at height in the mountains, and its presence in China and Asia is ideally positioned as a solid and trustworthy partner. We are supporting other developers looking to create urban leisure attractions on vertical structures such as the Guangzhou Tower, but also in indoor spaces to allow the public have fun and exercise throughout the year. »
Thomas Pesnel, Regional Director Asia & Oceania

About Canton tower

Situated on the banks of the Pearl River, Canton's panoramic tower is the must-see tourist attraction of the city, which has over 14 million inhabitants. It is one of the most spectacular buildings in the world due to its architecture and hyperboloid structure.
